

Mend the Gap Kick-off meeting

The Mend The Gap project began on 1 December 2022 and the project's kick-off meeting took place on 9 January 2023 in Valencia (Spain).

This meeting was an opportunity for the partners to meet face-to-face and to detail the work plan to be implemented to achieve the project's objectives. The 7 partner organisations attended the meeting and were able to present their activities and their roles in the project. Each WP leader presented their vision for finalising the resources involving partners' organisation and discussing the work methodologies to be applied.

The working session specifically focused on the WP2 - Target groups' requirements Analysis and Women needs Assessment Toolkit – since it was the first step in the project's implementation. Partners brainstormed about the format and methodology of the toolkit to agree on developing scenarios to assess women's needs.

Our host, MEUS, made sure that we enjoyed this first moment together, providing us great facilities to work as well as making us know more about Spanish culture!
